*"Queerness within/without the Archive", panel discussion 19/10-2022 at C/O Berlin. Part of the Utopia/Dystopia event series by Todd & Zoya

- Connections based on ideas, themes or other relations
- Mentions from visited archives and places
- Other forms of dialogue or exchange with BAS

This is an index of places
 Black Archives Sweden has visited and/or been in meaningful dialogue and exchange with during the period of September 2022 – February 2023, with funds from the City of Malmö and Region Skåne. The list includes archival projects, archives, independent project spaces, bookshops and community centers – all dedicated in their own ways to contributing with space, community, critical discourses and dialogues of our contemporary world. Almost all of them are independent spaces. The connections made between the places are not fixed or defined, rather a suggestion to movement and exchange. This index is limited, particularly in terms of places and geographies, but we hope to continue to add on and warmly welcome recommendations, especially of places outside of the West. Despite the limitations, we encourage you to look up these projects and spaces and support their work in any way you can, as many of them, regardless of location and their rich programming, operate on limited resources.
